Accuris qMAX cDNA Synthesis Kit, 25 Reactions

SKU PR2100-C-25 · Reagents & Kits · qPCR Reagents

The PR2100-C-25 is the entry pack of the Accuris qMAX cDNA Synthesis Kit family — a two-step cDNA synthesis kit (separate from the PR1100 One-Step

TECHNICAL SPECIFICATIONS

CAPACITY

25 reactions

WORKFLOW

First-strand cDNA synthesis from RNA template

KIT CONTENTS

1 tube of RTase (10 U/μL; potent RNase inhibitor...

PRIMER CHEMISTRY

Both oligo dT primers AND random hexamers included in the...

LIST PRICE

\$131.81

TYPE

Two-step cDNA synthesis kit (cDNA ≠ standalone product...

RNASE INHIBITOR

Included in the RTase tube — protects RNA from nuclease...

SISTER SKUS

PR2100-C-100 (100 reactions, \$464), PR2100-C-250 (250...

SISTER KIT (4-TUBE FORMAT WITH SEPARATE PRIMER TUBES)

PR2110-50 / -200 (qMAX First Strand cDNA Synthesis Flex...
