On-chip Droplet Selector HSG , 488 / 561 / 405 nm Lasers

SKU ONC-362DS001G · Life Science · Single-Cell Droplet Systems

The Yamato ONC-362DS001G is the On-chip Droplet Selector HSG, a microfluidic instrument that identifies, sorts, and dispenses specific water-in-oil

TECHNICAL SPECIFICATIONS

PRODUCT

On-chip Droplet Selector HSG

DISPENSING

Direct into 96- or 384-well plates, one droplet at a time

DETECTION LASERS

488 nm, 561 nm, 405 nm

HANDLING

High-throughput, damage-free (gentle) screening

SAMPLE FORMAT

Water-in-oil (W/O) droplets encapsulating cells or...
