Automatic Nucleic Acid Extraction System , 32-Sample Throughput

SKU VNP-32P · Life Science · Automated Nucleic Acid Extraction

The Yamato VNP-32P is a high-precision automated nucleic-acid extractor that purifies DNA and RNA from up to 32 samples per run using magnetic-bead

TECHNICAL SPECIFICATIONS

PRODUCT

Automatic Nucleic Acid Extraction System

WORKFLOW

Highly automated, fast, one-step operation

MECHANISM

Magnetic rods capture, transfer, and release beads

TYPICAL USE

Molecular diagnosis, research, animal-disease detection

WEIGHT

133 lb

REAGENTS

Prepackaged extraction reagent kits

CHEMISTRY

Magnetic-bead purification (silica-coated...

THROUGHPUT

Up to 32 samples per run

SAMPLE TYPES

Blood, tissue, cells, body fluids, bacteria, viruses

LIST PRICE

\$25,500.00
